

Supplementary Materials.

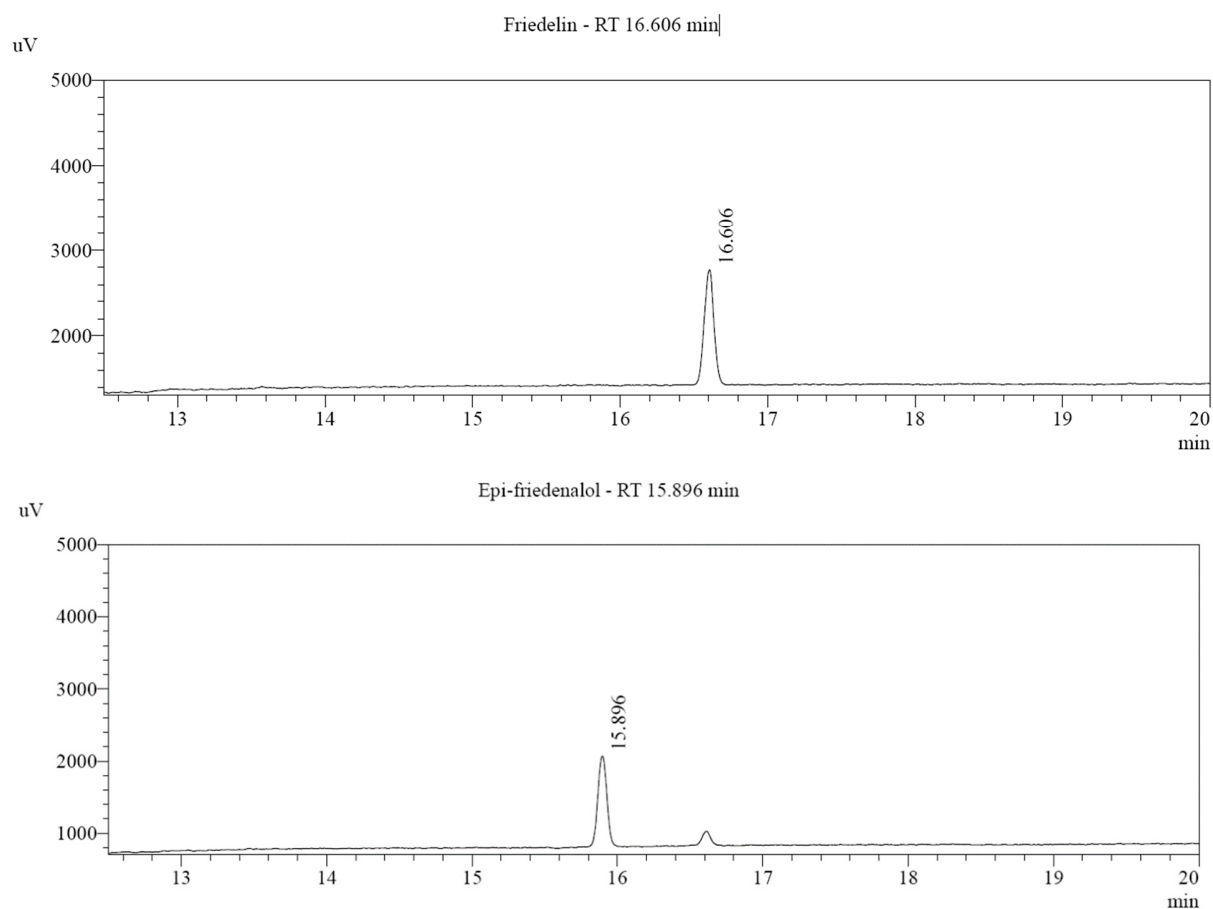

Figure S1. GC-FID chromatograms of standards friedelin and epifriedenanol

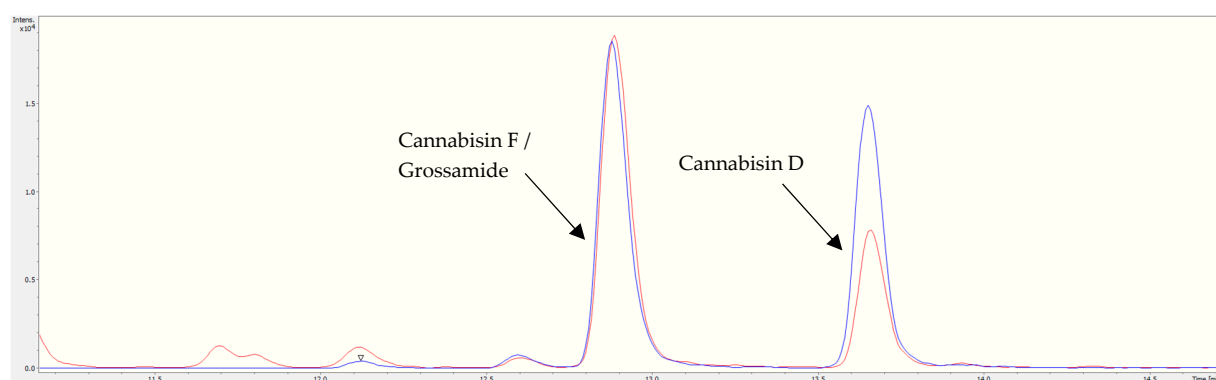

Figure S2. UHPLC-QToF chromatograms of cannabisin D, cannabisin F and grossamide quantification. Blue: standard of mixed cannabisin D, F and grossamide at 2 mg/L. Red: HHR sample. The peak at 12.9 min corresponds to cannabisin F and grossamide while the peak at 13.6 min is cannabisin D.
