

A**Viability for Dose Response_JWH-133****B****Viability for Dose Response_AM630**

Supplementary Figure S1. Viability Assay on IBD macrophages treated with different concentration of JWH-133 and AM630. The viability of IBD macrophages was estimated by a cytofluorimetric assay after treatment with JWH-133 (50, 100, 200 nM) and AM630 (5, 10, 20 μM). The histogram shows results as cell number $\times 10^5$ and as mean $\pm$ SD of independent experiments on five different patients. * indicates $p \leq 0.05$ compared to NT.
