

Supplementary Figure 5. Intracerebroventricular (ICV) injection of AAV.PHP.eB-gfap-GFP-*mgII*-shRNA, related to Figure 5. **(A)** Schematic illustration of the protocol for ICV injection of AAV-*mgII*-shRNA. **(B)** Immunostaining showing colocalization of GFP with GFAP, but not with NeuN following AAV vector injection. **(C)** Immunostaining showing reduced MAGL expression in astrocytes expressing the AAV-*mgII*-shRNA vector. Data represented as mean $\pm$ SEM **** P <0.0001 (ANOVA with Bonferroni post-hoc test, n =4 animals/group).
