

GEOMEAN of Three Reference Genes (Ubc, Tbp, 18S)

Supplementary figure 1. Geometric mean house of expression of housekeeping genes. Geometric mean of expression of Tbp and Ubc mRNA and 18S rRNA in hippocampus and prelimbic cortex of *Nrg1* TM HET mice and WT-like controls determined by qPCR (y-axis, mean $\pm$ SEM expression) plotted by postnatal day. n = 16-24.
