

Figure S1

Supplementary Figure legends

Figure S1: mGluR-LTD is significantly impaired in SPKO mice compared to WT. (*Left*) Time course of normalized fEPSP in WT (n=11 slices, N=9 mice) and SPKO (n=10 slices, N=7 mice). (*Right*) Quantification of average mGluR-LTD in the last 10 min of the recording. Data are mean $\pm$ SEM. WT=59.1% $\pm$ 4.8, SPKO=76.5% $\pm$ 4.4. **p<0.01 (Mann-Whitney test).
