

Supplementary data Fig. 6: The electrophoretic blots of Beta actin, BAX, BCL-2, Caspase-3, and Caspase-8 antibodies. The gel system used 10% SDS-PAGE polyacrylamide gel electrophoresis and was transferred to nitrocellulose membranes (Santa Cruz Biotechnology, Texas, USA).

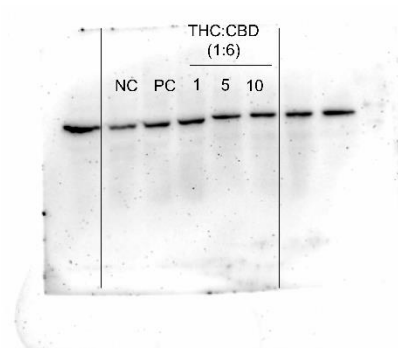

a. Beta actin

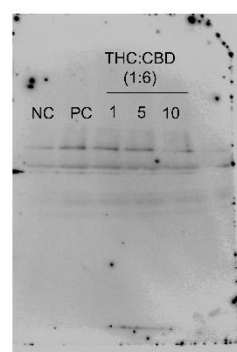

b. BAX

c. BCL-2

d. Caspase-3

e. Caspase-8
