

Supplementary Material

Supplementary Table 1: Sensitivity analysis findings for 15-fold increased costs for primary incremental outcomes and incremental cost-effectiveness ratios (ICERs) for maternal lifetime, infant childhood up to age 15, and combined mother and infants, central scenario

Outcome and time horizon	Incremental	ICER (£)
Expected cost (£)		
Mother	-55.84	
Offspring	-135.65	
Combined	--267.08	
LYGs		
Mother	0.017	-3220.55
Offspring	0.086	-1581.98
Combined	0.103	-2590.98
QALYs		
Mother	0.054	-1036.08
Offspring	0.098	-1381.02
Combined	0.152	-1,755.80
Benefit-cost ratio		
Mother		1.74
Offspring		2.74
Combined		4.31

Supplementary Figure 1: Cost-effectiveness scatterplots for three main scenarios
