

Blood D-amino acids

Supporting Figure 1. Detection of chiral amino acids in patients with diabetic kidney disease. D-Amino acid levels in the blood. Data, mean \pm SD. Abbreviations: CKD, chronic kidney disease; DKD, diabetic kidney disease.

Supporting Figure 2. Baseline level and ratio of blood D-serine in DKD. (A) D-serine level, (B) D-serine ratio, (C) blood creatinine, and (D) eGFR in each group. Data, mean \pm SD. * $P < 0.05$. Abbreviation: FD, fast decliners.
