

Fig. S1. Wireframe plots representing shape variation captured by the first three PCs of the regular landmark analysis (PC1, PC2 and PC3). Plots of PC1 and PC2 are shown in lateral view, plots of PC3 in dorsal view. Percentages between parentheses indicate the proportion of total variation explained by the respective PC. Black dots and lines indicate the shape at either high (first row) or low (second row) values of the respective PCs. Grey dots and lines indicate the average shape. Numbers refer to the landmarks as described in the MATERIALS & METHODS and Fig. 3.

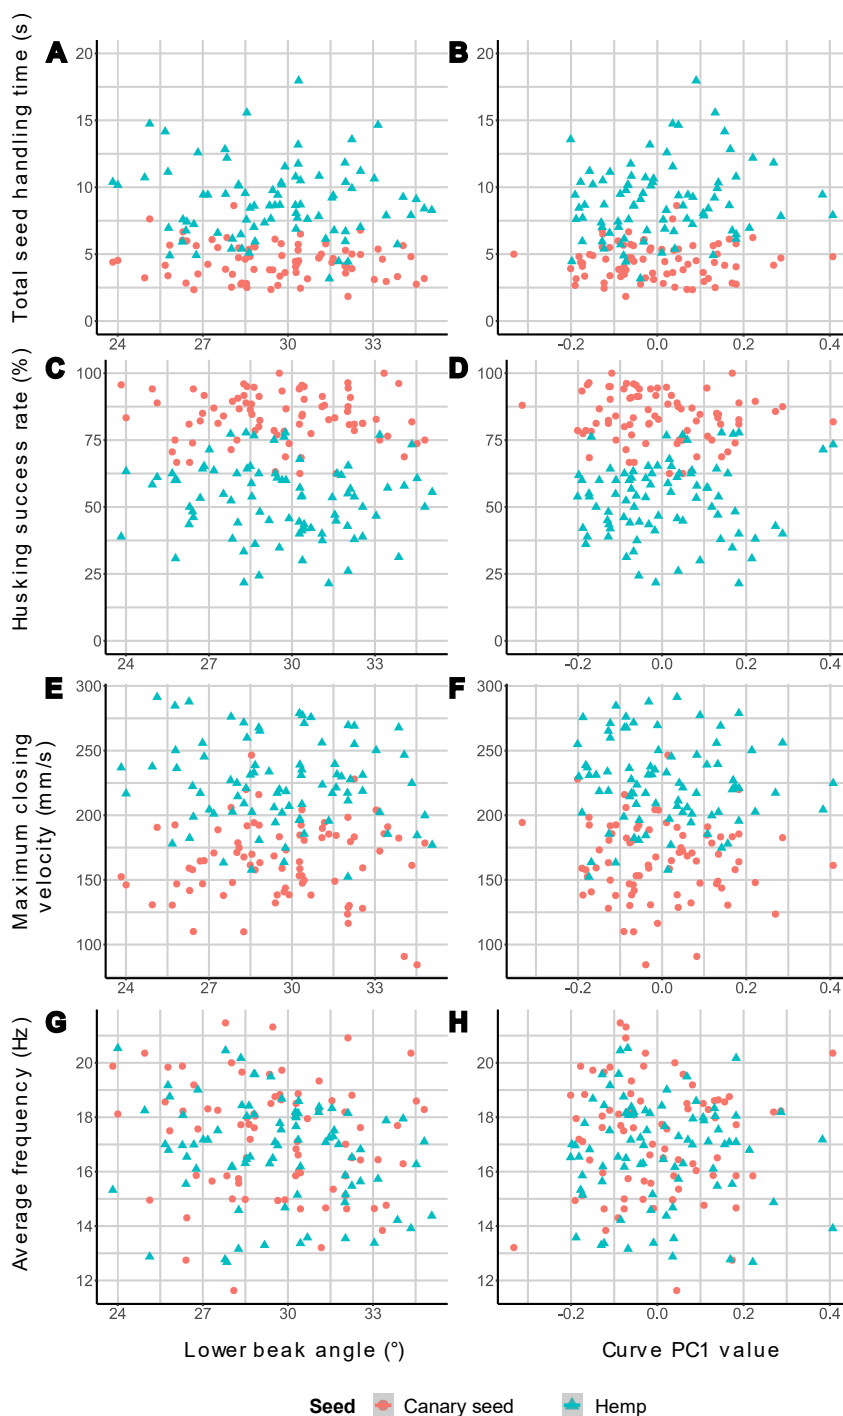

Fig. S2. Linear relationships of lower beak angle and PC1 of the semi-landmark analysis of the curvature of the upper beak with seed handling time (A-B), husking success rate (C-D), maximum beak closing velocity (E-F) and the average frequency of beak opening-closing (G-H) during feeding on canary seed (N = 79) and hemp seed (N = 82). Data points represent individual birds and are the mean value of either 10 feeding trials (total seed handling and success rate) or 5 feeding trials (maximum closing velocity and frequency). Numerical and statistical results of the regression analyses can be found in Table S2.

Table S1. Summary statistics of the PCAs of the regular landmark analysis to capture overall beak shape and the semi-landmark analysis to capture the curvature of the upper beak. The first 10 PC-axes are reported.

PC axis	Overall beak shape (Fig. S1)		Curve upper beak (Fig. 4)	
	Eigenvalues	Proportion of variance	Eigenvalues	Proportion of variance
1	0.00105	0.1967	0.01909	0.8869
2	0.00073	0.1377	0.00125	0.0580
3	0.00056	0.1054	0.00087	0.0405
4	0.00043	0.0803	0.00011	5.0156*10 ⁻³
5	0.00040	0.0754	7.5030*10 ⁻⁵	3.4860*10 ⁻³
6	0.00038	0.0715	3.0416*10 ⁻⁵	1.4131*10 ⁻³
7	0.00034	0.0634	2.1427*10 ⁻⁵	9.9551*10 ⁻⁴
8	0.00026	0.0498	1.6380*10 ⁻⁵	7.6103*10 ⁻⁴
9	0.00018	0.0334	1.2029*10 ⁻⁵	5.8900*10 ⁻⁴
10	0.00016	0.0297	9.4971*10 ⁻⁶	4.4124*10 ⁻⁴

Table S2. Summary statistics of the independent variables per regression model. Significant p-values are indicated in bold.

Variable	Slope estimate	Standard error	t-value	p-value
Handling time (s)
